

# Product Application Manual

## PREPARE:

Vacuum the surface to remove any visible dirt.

## DEGREASE:

Use a mild cleaner to clean the surface.

## SUITABLE FOR:

✔ Leather    ✔ Vinyl    ✔ Plastic

## PRODUCT APPLICATION INSTRUCTIONS:

**01**

Gently shake the Restore Bottle before use.

**02**

Open the lid and apply generous amount of coating on the dry/new applicator pad. Put the lid back on the bottle after applying on the applicator pad to stop the product from curing inside the bottle.

**TIP:** Before applying ceramic coating, test it on a small surface to avoid discoloration.

**03**

Work in cross-hatch pattern on small areas and make sure the coating is applied evenly. Spread the product with your applicator pad and ensure there are no streak marks.

**04**

Let the product dry for 30 seconds and remove excess residue using a 380gsm microfiber cloth. Inspect the surface thoroughly after wiping off to ensure there are no haze marks.

**05**

Apply just one layer of Restore ceramic coating and allow it to dry for at least 6 hours.
